RED RICH

See center pages for illustration of RED RICH in natural colors developed from an actual photograph.

We Are Licensed Propagators of RED RICH and Have Exclusive National Rights for the Propagation and Distribution of Potted Plants.

Any other supply of potted RED RICH Strawberry plants is one of our sub-licensed co-operators.

We are one of three licensed propagators of RED RICH and one of five interested parties in the ownership and promotion of **Hagerstrom's New Patented "Red Rich" Strawberry**. We have exclusive "potting" rights.

RED RICH is a patented plant (Plant Patent No. 933) and is sold under contract for the personal use only of the purchaser. It is unlawful to sell, give away or otherwise dispose of any plants reproduced.

This Trade Mark Protects You.

The illustration shown at the left represents the mark by which genuine RED RICH Strawberry plants are identified. This trade mark has been adopted and registered by the licensed propagators and is the sign by which RED RICH are known to be genuine.

PRICES OF "RED RICH" STRAWBERRY PLANTS

Field Grown Plants—12, \$2.95; 25, \$5.00; 50, \$8.50; 100, \$15.00. (Prepaid prices)

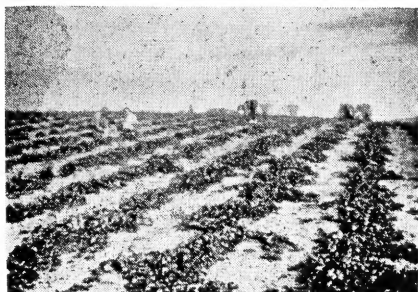

POTTED PLANTS—From 2¼" clay pots or in 2¼" veneer pots, 12, \$3.75; 25, \$7.00; 50, \$12.00; 100, \$20.00. (Prices prepaid to the 3rd postal zone. If you live beyond the 3rd zone consult Parcel Post rates on another page for additional for postage beyond the 3rd zone to include with your order).

POTTED PLANTS are shipped either from 2½" clay pots or in 2" veneer pots and are well rooted and growing, ready to start right off after being set in the ground. **They are very satisfactory, especially if dry conditions prevail at the time of arrival and no matter what the weather conditions there is scarcely a chance of losing a single plant.** If you are not ready to set them in the soil on arrival they may be held for days until you are ready to plant them so long as the soil on the plants is kept moist. **REMOVE THE POT BEFORE PLANTING.** They are especially adapted to long distant shipments.

The potted plants you will receive will look similar to the illustration on the right. Some will be in bud and bloom. They are already growing and all you have to do is to remove the pot by cutting one corner and unwrapping the veneer and carefully setting the plant into the ground being sure to firm the soil well around the plant. Remove all blossoms from the plants until July first then let them begin to fruit and they will begin bearing by August first and continue well into October.

THIS NEW EVERBEARER HAS EVERYTHING:

Field of RED RICH Strawberry Plants

- Beautiful appearance
- Outstanding dessert quality
- Exxxcellent freezing quality
- Unsurpassed keeping and shipping quality
- Heavy fall crop—and a good spring crop
- Resistance to leaf spot and other diseases
- And—A GOOD PLANT MAKER TOO!
- It has proved to be the berry you have been waiting for.

"RED RICH" MAKES FINE BORDER PLANT

RED RICH Strawberry plants are well adapted for use as border plants along walks and around flower beds and are not only very attractive but also are practical and will produce profitable quantities of delicious fruit for table or dessert purposes.

Single Plant of RED RICH Loaded with Fruit in October

"RED RICH" STRAWBERRY IS HARDY

Regina, Sask., Canada—February 7, 1953. I have never seen strawberries produce fruit like RED RICH. I have had them two years and never had them winter kill on me. RED RICH can't be beat.—Carl A. Leitz.

Harmon-on-Hudson, N. Y.—June 4, 1952. A year ago this spring I bought 25 plants of RED RICH Strawberries from you. I put them in a bed 30x10 of not too good soil and this spring they fill the bed and stand up straight a foot or more high. They are so full of blossoms and green fruit that I give up even trying to count the number on one plant.—Sister Juliana.

Franklin, Minn.—September 16, 1952. I sent for 50 potted RED RICH plants this summer and planted them in one of your Pyramid Gardens. The plants are large and did fine.—Henry Hewitt.

Rolla, N. D.—The RED RICH Strawberry plants that I ordered last spring were very satisfactory and are doing fine.—Mrs. Jas. H. Penny.

Sioux City, Ia.—October 30, 1952. We set out the strawberries (RED RICH) last spring and kept the blooms cut off until the first of July and from then until the fifteenth of October we had all the strawberries we could use and I never saw such fine strawberries.—Ernie Vennard.

The WAYZATA Everbearing Strawberry

THE STRAWBERRY SUPREME

Will Pay for Itself in Fruit the Same Season Planted

The WAYZATA is an all season strawberry accidentally discovered at Wayzata, Minnesota, from whence it derives its name. It will bear a heavy crop of berries in June and a fall bearing season of three months during August, September and October. It is acknowledged the best of the everbearing strawberries with the exception of RED RICH and superior to other varieties in size, flavor and productivity.

Being a shy reproducer of new runner plants Wayzata is especially adapted to the hill system of planting.

WAYZATA PRICES

All prices prepaid unless otherwise noted.

WAYZATA EVERBEARING STRAWBERRY—Originator's stock; genuine, true to name:

FIELD GROWN PLANTS—25, \$2.00; 50, \$5.50; 100, \$10.00.

POTTED PLANTS—(Potted plants are prepaid to the 3rd Postal Zone only; if you live beyond the 3rd zone consult Parcel Post rates on another page for additional to include for postage beyond the 3rd zone with your order). 25, \$4.25; 50, \$8.00; 100, \$15.00. 100 by express not prepaid, \$13.00.

OTHER EVERBEARING VARIETIES

GEM—Heavy fruiting; good plant maker. Price: 25, \$2.00; 50, \$3.25; 100, \$5.00; 250, \$8.50.

GEMZATA—A cross of Gem and Wayzata. Extra large, firm fruit, Price: 25, \$2.25; 50, \$3.50; 100, \$6.00; 250, \$10.00.

- **STREAMLINER**—Sweet, jumbo sized berries; one of the best for freezing. Price: 25, \$2.40; 50, \$4.00; 100, \$7.00; 250, \$12.00.
- **SUPERFECTION**—Large fruits; reproduces freely; abundance of fruit. Prices, same as Streamliner.
- **20TH CENTURY**—An outstanding everbearer; second only to RED RICH and Wayzata. Price: 25, \$3.75; 50, \$6.00; 100, \$9.00; 250, \$20.00.

JUNE BEARING VARIETIES

- **DUNLAP (Early)**—An old standard. Fruit medium size, dark red. Resists drouth and cold weather better than most varieties.
- **PREMIER (Early)**—Very early; produces large, bright red berries.
- **ROBINSON (Midseason)**—Known as the finest commercial June-bearing variety. Good for canning, freezing, preserving.
- **FAIRFAX (Early)**—Berries, dark red; quite productive; long picking season.
- **NEW ARROWHEAD**—Similar to Dunlap. Berries are large; good for market, freezing and jam.
- **SPARKLE (Medium late)**—Vigorous; productive; excellent quality fruit.
- **AMBROSIA (Late)**—One of the largest; fruit delicious for every purpose.

Prices for any of above June-bearing varieties, prepaid, 25, \$1.50; 50, \$2.25; 100, \$3.50; 250, \$6.50; 500, \$9.50.

- **ARMORE**—The most beautiful June bearer we have ever seen. Very productive. Prices, same as Vermillion.
- **VERMILLION**—A vigorous grower; produces heavy crop of fine fruit early. Red Steele resistant.

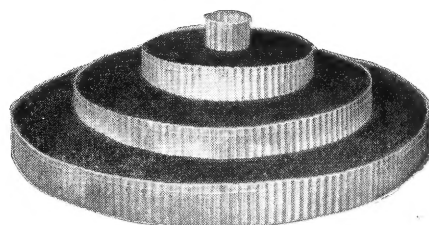

A planting guide will be included with each order of strawberry plants.

NU-WRINKL

TRADE MARK

PLANTING PYRAMID

Holds up to 100 large everbearing strawberry plants. Easy to weed, water and protect from birds. Berries stay cleaner, are easier to pick. Makes a strawberry bed practical for any back yard.

Make beautiful flower beds. Other designs available. If interested, write for complete folder. Full instructions for assembling, and planting guide with each kit. Price, f.o.b. Albert Lea \$7.95. Postage additional, 1st and 2nd zones, 63c; 3rd zone, 84c; 4th zone, \$1.10; 5th zone, \$1.50; 6th zone, \$1.99; 7th zone, \$2.44.

Price, with 50 field grown RED RICH Everbearing strawberry plants, \$16.45; with 75 RED RICH, \$19.20.

POTTED STRAWBERRY PLANTS

Advantages of Buying Potted Strawberry Plants — They Make Stronger and Better Plants — They Reproduce New Plants and Bear Fruit Earlier

Buying potted strawberry plants is the most economical and practical way to start a strawberry bed either for the home owner or the commercial grower as there is not a chance for the failure of the plants to continue to grow after they have been set in the soil if they have been properly set to begin with.

After removing the pots from the plants, which are **ALREADY WELL ROOTED AND GROWING**, and properly setting them in the soil where they are to be permanently located **THEY KEEP RIGHT ON GROWING AND WILL ESTABLISH THEMSELVES IN THE NEW ENVIRONMENT AT ONCE AND WILL PRODUCE NEW PLANTS AND BEAR FRUIT EARLIER THAN FIELD GROWN PLANTS** because they are hardier.

The Use of Potted Plants Prolongs the Planting Season Throughout the Summer and Fall Months

Potted plants may be planted any time during the year and, if you failed to get plants started early in the spring, by the use of potted plants you may start a strawberry bed any time during the year that the soil can be worked. We have them available throughout the year.

During dry seasons or periods of drouth some special care should be given newly set out plants to provide them with ample moisture to encourage growth and to give the plants an opportunity to establish themselves in their new environment. If moisture conditions of the soil are normal no extra care is required.

The potted plants are well adapted to fall planting in preparation of a bed of plants that will produce early the following season. Late planted everbearing strawberry plants will not likely produce any fruit in this period and should be properly mulched for over winter but will be ready for an early start the following spring and should reproduce new runner plants early and a prodigious crop of fruit during the summer and fall.

The potted Everbearing Strawberry plants will begin to bloom, if they are not already in bloom when received, in a short time after they have been set out in the permanent location.

For most satisfactory first season results the blossoms should be removed from the mother plant as they develop until the latter part of June to encourage strong, healthy root development. After July first the plants should be allowed to bloom as they will and early in August they should begin to bear ripe fruit and during September and October should bear a tremendous crop, a quart to the plant, in the same season planted and continue to bear until freezing conditions end the further possibility of fruit production.

front yard or back Your Garden Centerpiece

PYRAMID (Trade Mark)

CIRCULAR TERRACED GARDEN

In one-third the space of the conventional garden method you can enjoy an abundant full season growth of everbearing Strawberries with a PYRAMID circular terraced garden. Easy to pick from—easy to care for, this attractive garden adds real beauty and practical value to any garden or landscape. Perfect too, for low growing perennials. Made of tough aluminum alloy it will not rust or corrode. Merely fill first ring with rich soil, trample. Repeat for remaining terraces.

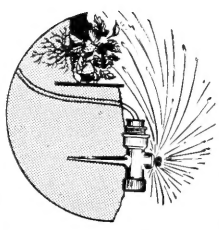

Available in Two Sizes:

LARGE SIZE. (Four terraces—6 ft. diameter, perfect for 50 everbearing Strawberry plants) **\$9.95**

JUNIOR SIZE. (Three terraces—4½ ft. diameter, ideal for center planting of perennials—flowers of all kinds) **7.95**
6 SUPPORT STRIPS (Large Plant Pyramid Only) **3.95**
COVER (Plastic) (Large Plant Pyramid Only) **5.95**
NET (Mesh) (Large Plant Pyramid Only) **5.95**
SPRINKLER (Complete with copper tubing and all connections) **4.95**

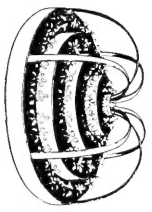

PRICES ARE POSTPAID

HELPFUL ACCESSORIES

SPRINKLER—comes complete with copper tubing, nozzle and hose connection. Covers entire bed. (Optional).

COVER or NET—aluminum support strips illustrated holds plastic cover as miniature greenhouse for early planting or frost protection. Net is used during growing season to protect from birds.

The **AMAZING** Wonder Strawberry

Red Rich was developed through 15 years of Strawberry research—the best of 15,000 Strawberry seedlings. It will stand out above other varieties in giving you more of those desirable Strawberry qualities—rich color, sweetness, flavor, and bounteous crops. A leading mid-western University reports "Red Rich—the best of 29 kinds tried" and from everywhere we hear, "Best ever tasted." "Bright red to the core and sweet as sugar." "More and better flavored berries than any other everbearing type."

Bears and Bears

Red Rich ripens huge luscious berries early in the season like other kinds—but they keep on ripening in a never ending succession right up until frost. And just wait until you taste one. One bite of a big firm Red Rich berry and you'll say it's the best ever. Bright red through to the core and loaded with rich Strawberry flavor.

Freeze Them Whole

Unsurpassed for freezing. Your Red Rich berries will be firm, have a fresh color, and will be honey-sweet when you thaw them out weeks later. You can enjoy them all year long!

Mammoth Plants—Huge Berries

You've never seen Strawberry plants so big and vigorous as these. Every husky, disease-resistant plant yields a big crop of berries and the handsome, large, dark green foliage is mighty attractive as an ornamental, too.

UTILITY STOCK—Under one year, includes cockerels for cross breeding purposes, cockerels or pullets, \$5.00 each. Yearling hens, \$5.00 each.

TERMS AND CONDITIONS

Cash with order. Orders booked more than 90 days before requested delivery will be accepted if accompanied with a deposit of 25% of the total amount of the order; the balance to be paid prior to the time of shipment of the order. No refunds for cancellation of orders booked in advance. We cannot accept C.O.D. orders.

Our plants are large and well rooted, state inspected, free from disease and true to name. **Every order of plants is precooled** before shipment and guaranteed to reach you in good condition. We have shipped plants as far distant as **Hawaii and Alaska**. The potted strawberry plants ship exceptionally well to greater distances and prove very satisfactory. They are easy to plant and are already growing in the pots. When removed from the pots and set in the soil they continue to grow without the loss of a single plant.

DISCLAIMER

The planting and care of the plants sold by us being beyond our control, we offer no guarantee except that the plants will reach you in good condition and be true to name.

If the plants are not received in satisfactory condition, notice should be given us within ten days otherwise we must assume that they were received in good condition.

The personnel of our shipping department is not infallible and unintentional mistakes are sometimes made but in case of claims for unsatisfactory plants or plants that prove to be untrue to name our responsibility ceases when we have replaced the order with an equal number or equal value of the same variety of plants of proven quality and/or nomenclature.

Write for prices on quantities of plants larger than listed in the price list if interested.

We have field grown strawberry and raspberry plants in refrigerated storage and can usually make shipment of orders most any month except June, July and August. The potted strawberry plants are usually available the year round.

Planting and cultural directions for strawberry plants are included with each order.

PARCEL POST RATES

We prepay all orders, unless otherwise specified, to all points within the third postal zone, 300 miles from Albert Lea. The city of Albert Lea is 100 miles south of Minneapolis and St. Paul.

If you live in the fourth zone, 301 to 600 miles, for each 12 raspberry plants add 15c to the amount of the order; for each 25 potted strawberry plants 20c.

Fifth zone, 601 to 1000 miles, add 40c for each 12 raspberrry plants; 45c for each 25 potted plants.

Sixth zone, 1001 to 1400 miles, add 60c for each 12 raspberry plants; 80c for each 25 potted plants.

Seventh zone, 1400 to 1800 miles, 80c for each 12 raspberry plants; \$1.10 for each 25 potted plants.

Eighth zone, over 1800 miles, \$1.00 for each 12 raspberry plants; \$1.45 for each 25 potted plants.

These rates obtain on all raspberry and potted strawberry plants offered in the price list regardless of quotations which might be construed otherwise.

If the proper amount of postage is not included, the order will be shipped C.O.D. for the balance of the amount due.

If you live beyond the third zone be sure to add to your order the specified amount for the number of plants ordered to your zone as indicated above.

CANADIAN IMPORTS

Canadian importers of plants must apply to their own Department of Agriculture for a special importation permit and shipping tags which should be forwarded to us for attachment to the shipment. All Canadian shipments considered seventh zone.
